Congregational Partnerships in Mission

Take a new road

Witness Partners Covenant:

Christians around the world are called to work together, each bringing their particular gifts and talents as together we align with what God is doing. Mennonite Church Canada Witness understands that ministry, across the street and around the world, lies with Christians who are willing to commit themselves to meaningful partnerships. This 'new road' will require clear understandings and commitment on the part of all those who wish to take it. This covenant is intended as a tool to help clarify such partnerships.

Each partner understands that they are called by God and sent together in Jesus' name. Not all partners have the same role, but all share in a relationship that strives to learn, listen and respond to each other. By covenanting together we are saying clearly how this relationship calls us to action and invites another perspective into our lives.

Mennonite Church Canada Witness trusts that the commitment of gifts made in this relationship will be reciprocated by ministries, partners or international workers with the gifts they have. This is an exciting, sometimes challenging, road of relating to each other. Congregational Partnership Facilitators, Witness Workers, and other Mennonite Church Canada staff are here to walk with you in the opportunities God is providing for us.
